UNCOMPROMISING ATTENTION TO DETAIL

Our commitment to pushing the boundaries of maritime engineering ensures that every super rib is meticulously designed to exceed your expectations. From the moment you step aboard, you will experience first class design and technology, bespoke craftsmanship, and attention to detail.

Indulge in the ultimate luxury experience as you navigate the seas in a vessel tailored to your desires. Whether you seek a serene cruise along the coastline or an exhilarating offshore expedition, Enigma Powerboats is your trusted partner in making waves with style, sophistication, and safety.

THE RANGE

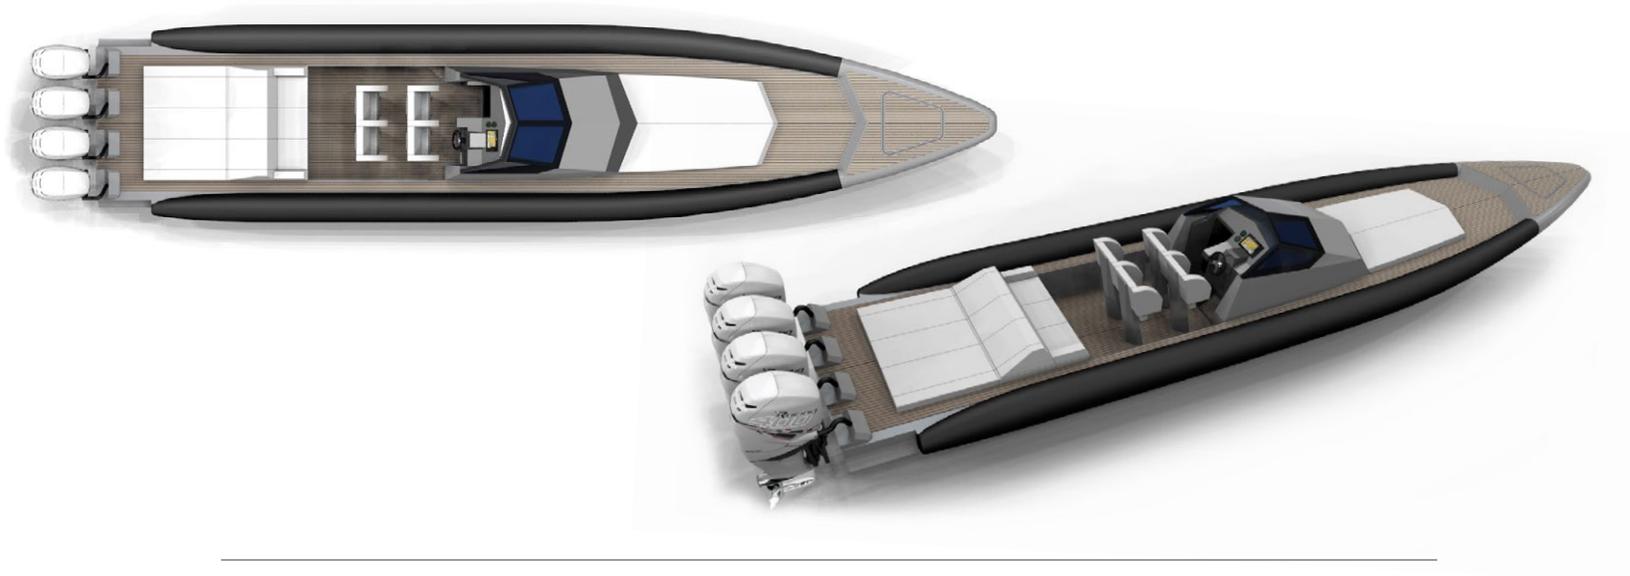

ENIGMA 38 OPEN

Headlining style down to the very last detail - our Flagship Enigma 38 Open, as showcased throughout this website, is fully customisable. Long or short journeys, speed or cruise, single or multi use set up, Enigma can provide it all. Contact our team to discuss design and build of your bespoke Enigma.

THE RANGE

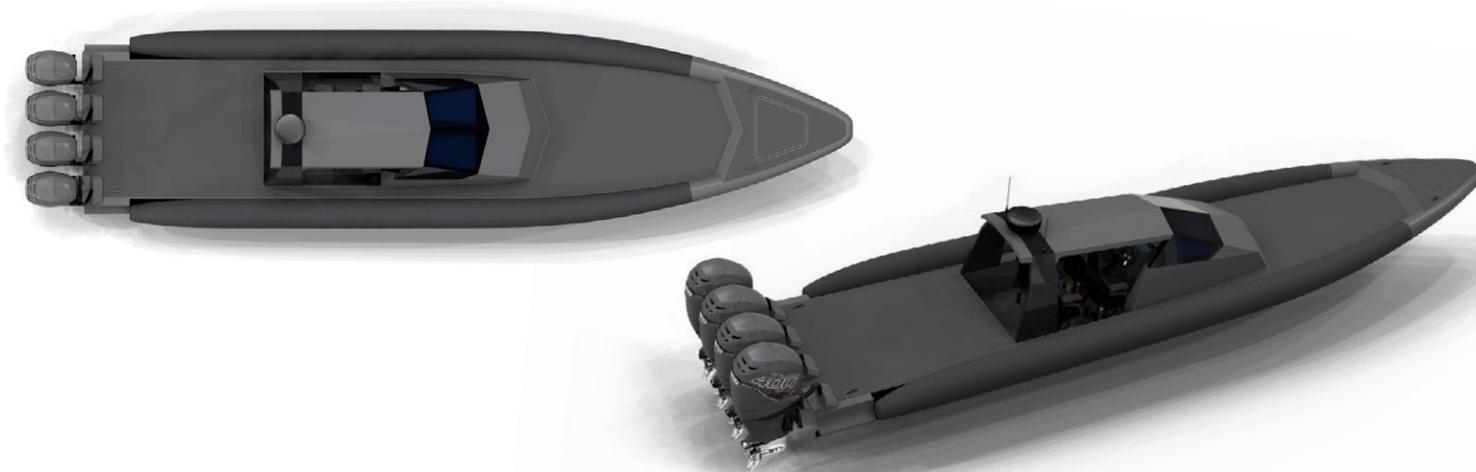

ENIGMA 40-45 FT

Further enhance your desired deck layout options and design by choosing a larger platform. Superb for overnight cabin layouts, for longer trips away. Option to increase engines and horsepower.

THE RANGE

THE ENIGMA COMMERCIAL

Enigma offers a superb platform to support both commercial and military use. With Offshore CAT B status Enigma commands high diverse wave challenges. The ballast tank system (as used by military, sea rescue, commercial ribs) ensures smooth planing and minimal WBV body slamming for crew especially when on long periods onboard. The wide 3.4m beam and deck area is well suited to storing and carrying extensive loads and equipment. And with the option for over 100mph speeds, Enigma will rapidly move from destination to destination.

ADVANCED SAFETY IS AT THE FOREFRONT OF OUR SUPER RIB PERFORMANCE

The Enigma Team are serious about safety and include features not found on many powerboats, demonstrating our commitment to ensuring the highest level of protection and comfort for all onboard.

A COMFORTABLE RIDE IN ALL CONDITIONS

The thrill of high speed, exciting powerboating must never compromise comfort and safety. We consider it essential to mitigate 'slamming' with ariable sea water ballast tank actng like a damper to stabilise a bouncing bow.

SMOOTH WATER FLOW

Enigma accommodates a 3.4m wider beam, with ample social deck space and a closer tube positioning ensuring smoother water flow and a continued pleasurable ride.

ALL ABOARD SAFETY

We apply an innovative Wireless Kill Cord System in the form of easy wear wristbands. In the unlikely event of a wearer falling into water the wireless notification triggers, cuts the engine and identifies their location.

EXTREME IMPACT SAFETY

Shark Suspension units are unique offering leaf spring for optimal rebound of 225mm ultra smooth movement, with a lightweight, corrosion proof, and ultra modern design.

SMART AUTOMATED APPLICATIONS

In today's world it's not surprising that smart solutions have transferred to the marine leisure industry, revolutionising easier, stress free and safer boating. Click on the Enigma Additions page to view options.

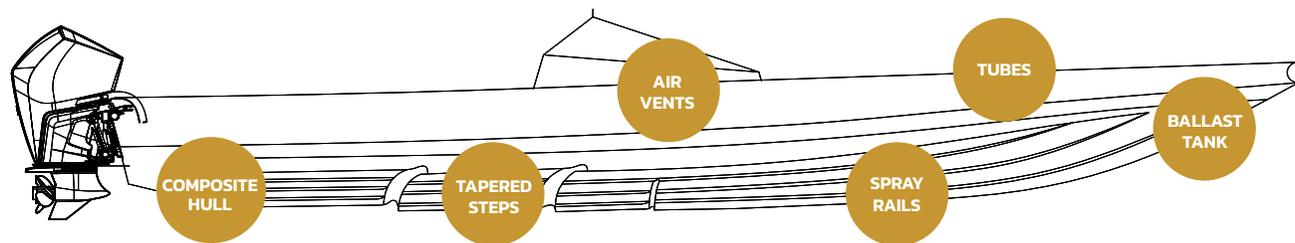

POWERBOAT TRAINING

To support your confident handling we include the opportunity to increase your anchoring/ mooring abilities, buoy/navigational, ropes/ knots, weather/tide knowledge with Boatability.

TECHNOLOGY KNOW YOUR ENIGMA

Years of expertise in powerboat design, craftsmanship and racing provide the technological applications that create each outstanding Enigma. **Visit our technology page online to read more.**
