PATENT & TRADEMARK

« Never get cornered again »

The Director of the United States Patent and Trademark Office

has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this

United States Patent

Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America for the term set forth below, subject to the payment of maintenance fees as provided by law.

If this application was filed prior to June 8, 1995, the term of this patent is the longer of fourteen years from the date of grant of this patent or twenty years from the earliest effective U.S. filing date of the application, subject to any statutory extension.

If this application was filed on or after June 8, 1995, the term of this patent is twenty years from the U.S. filing date, subject to any statutory extension. If the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121 or 365(c), the term of the patent is twenty years from the date on which the earliest application was filed, subject to any statutory extensions.

Corner Shot ®

- The Corner Shot is a high-tech weapon system invented by Amos Golan, a former commander in the IDF who specializes in anti-terror and special operations. The Corner Shot enables military, law enforcement and security operators to effectively observe and accurately engage targets from « around the corner » or behind cover without exposing part of the operators's body.
- The Corner Shot consists of a jointed two-part system:
 - A forward section housing the assault weapon, camera and other special features. And
 - The frame, containing all of the operating features and controls.
- The Corner Shot system was designed and built around the standard assault rifle configuration so as to enable simple, convenient operation in line with familiar combat drills and standard firearms handling procedures.

The image shows a collage of media coverage for Corner Shot weapons. It includes a screenshot of the Hürriyet website's 'GÜNDEM' section with the headline "Sokak çatışmalarına yeni teçhizat" (New equipment for street fights). Another headline reads "TSK'ya 'köşeli' silah" (Cornered weapon for the TSK). A third headline states "Askere modern savaş silahı! Sadece 2 ülkede var" (Modern war weapon for the army! Only in 2 countries). The images show soldiers in full combat gear using the Corner Shot weapons in various settings, including urban environments and training areas.

Corner Shot ® User Feedback

United States Marine Corps

User Feedback

"During our deployment we successfully cleared several hundred buildings using the cornerShot and sustained zero casualties"

"It is my opinion that the cornerShot is an excellent piece of equipment, which will potentially save many lives"

From : Sergeant William James King
3rd Battalion, 4th Marine Air Company, 4th Platoon,
United States Marine Corps
To : Amos Lotan
Subject : Corner Shot

As the assault element commander for 4th platoon during this deployment I was directly responsible for the training and employment of the CornerShot. During our deployment we successfully cleared several hundred buildings using the CornerShot and sustained zero casualties. The CornerShot allowed us to complete some of the most dangerous aspects of close quarters battle without endangering my Marines. The degree of stand off that the CornerShot allowed us to maintain from enemy personnel allowed us increased time to decide and act on a course of action. During our operations we were to disarm one insurgent who we otherwise would have shot; had we not had the CornerShot. Because of his capture, we were able to gather intelligence leading to several other insurgents being detained. It is my opinion that the CornerShot is an excellent piece of equipment, which will potentially save many lives. I have also sent you an after action report detailing my views on the CornerShot and I hope you will find them useful in your product development.

Sincerely ,

Sergeant William James King,
Sergeant Platoon

Mr. Rene Shast
4 Derrich Buchanan,
Tulsa, OK 74104

Dear Mr. Rene Shast,

I just wanted to send you a letter of appreciation for your CornerShot weapon system. Last year we purchased CornerShot weapon systems for our Swat Team and we are highly recommending it to all other agencies in our area.

Over the last year we have deployed it to at least 100 high risk entities and several barricades.

One thing I have found out working Swatter the last 20 years is equipment is great, but tactics save lives. Let me explain. Over the years we have used cutting techniques (P) to search rooms and it works great. But you still leave yourself open at some point. Then the search rooms came into play, but hooding owners and footlights and weapons just make the searching difficult in CQB areas and you still have a delay in the use of deadly force if needed.

The next generation of gun we used was search camera poles and that worked well, but the tactics still made the CQB uncomfortable.

Since we purchased the CornerShot last year, we have found that the system works great in the Swat operations around CQB. The system lets the operator have a weapon light & laser, a camera and a firearm all in one, and in a single operator's hands, so there is no time lag between seeing and using.

JIM KARNES FRANKLIN COUNTY SHERIFF
FRANKLIN COUNTY HALL OF JUSTICE
380 South High Street Columbus, Ohio 43211 (614) 421-2100

The weapon system has given the operator the tools to search as he moves and we find it works great in searches of offices and crew spaces, and in tight spaces like under beds and closets and stairs.

Just last week we had a case that barricaded himself in a house after he beat his girlfriend with a high power rifle and threatened to kill anyone that would come after him. After 1 hour of trying to negotiate with him, we were ordered to go in and take him into custody.

After searching the entire 3 story home we made our way to the basement cellar area, the first place to search, and we found him in a small area under the stairs. Using the CornerShot I was able to search around the corner, between a washer and dryer, and spotted the suspect hiding.

The great thing with the CornerShot system is that even if he would have gotten a shot off at me, I was behind a brick wall and had great cover, but yet, I had the shot if needed.

Good tactics and good equipment makes safe missions.

Thank for your products, and just to let you know, we are now going to order our entire CornerShot weapon system.

Sincerely,
Kelly
